

# THE DAILY CONSTITUTION: ATLANTA, GA., THURSDAY MORNING, JULY 15, 1880.

## The Constitution.

### FOR THE CAMPAIGN.

A campaign of unprecedented interest, involving national, state and local issues is just opening! The various candidates are in the field and the battle has already begun!

No man of intelligence should be without a first-class paper for the next few months.

The Constitution in its various editions is the best newspaper that the people of Georgia and the surrounding states offer at the following rates:

Daily Edition 1 month. \$1.00  
Daily Edition 6 months. \$4.00  
Weekly Edition 6 months. \$1.00

The Constitution for the campaign will be the newest, brightest and completest newspaper ever offered to the southern people. Address:

CONSTITUTION PUBLISHING CO.

Editorial office, Atlanta post-office, December 11, 1879

ATLANTA, GA., JULY 15, 1880.

The national democratic committee met yesterday and elected the executive committee, giving a place on that important body to Hon. George T. Barnes, of Georgia. The full committee then adjourned and proceeded in a body to the residence of Mr. Tilden, in order to pay their respects to the great democratic leader.

Mahone, of Virginia, proposes to test the financial standing of both parties. It depends altogether on the size of the barrel whether the readjusters carry the state for Hancock, or whether they turn the eleven electoral votes over to the republicans. As the John-Kelly of the old dominion, Mahone seems to be a very small potato.

The most insignificant and hopeful piece of information that has come to hand during the campaign is the statement to the effect that that abominable old "tut-tut-hunter," Cyrus W. Field, will vote for Garfield. Now that this has been settled, the other issues of the campaign may be left to take care of themselves.

The torrid wave which is now over-lapping Atlanta seems to have its center somewhere in the neighborhood of New York and Chicago. There were seventeen sunstroke in the latter city Tuesday, eight of which were fatal. The weather is not favorable to the peculiar temperament of Mr. Blaine, and he is justified in keeping on the shady side of the house.

TROUBLE is reported between the Wallace and Randall factions in Pennsylvania, and the probabilities are that the Randall crowd are at the bottom of it. They are a very noisy and energetic set, and will not hesitate to sacrifice the party to their personal spite. This whole matter is in the hands of Mr. Wallace and Mr. Randall. They can settle it in a moment, and this they are expected to do.

The Buffalo Express is willing to admit that there would be any danger of personal injury to such republicans as Conkling, Blaine, Hawley and others, if they should venture to come as missionaries to the solid south. Has the Express enlisted all the dangers of such a tour? Has it even contemplated the possibility that some red-handed rebel, after six years of age, might creep up behind one of these statesmen and burst a paper-bag?

SCHREZ is not at all mealy-mouthed in his remarks concerning the attitude of the leaders of the Grant movement, and, on the whole, he is inclined to look complacently on the general sulkiness which has marked their demeanor since the Chicago convention. Schurz says that if such men as Conkling and Don Cameron continue to treat the Chicago ticket with disdain, they will soon be without followers, and he proceeds to argue from such premises that in a few weeks at least they will be found harrasing for Garfield until they foam at the mouth. It is to be borne in mind, however, that Schurz assumes these men to be as contemptible as politicians as he is himself, and the truth seems to be that the coolness of Conkling, the illness of Cameron and the disgust of Sherman will be important to those who make up their following.

**A Democratic Folly in Virginia.**

The troubles in Virginia promise to be serious. Mahone, who is the leader of the readjusters, so-called, has put an electoral ticket in the field, and he and his organ bid defiance to the regular democratic party. These divisions have already attracted the attention of republicans, and the national committee of that party, it is said, is taking steps to put itself in communication with Mahone, in the hopes of widening the breach. Mahone appears to be an exceedingly ambitious politician, and it he once gets his lips glued to the hinge-hole of the republican barrel, the democrats will have hard work to carry the state. Mahone's electoral ticket is for Hancock and English, but if the democracy is to be divided among two electoral tickets, the republicans will have a comparatively easy task to carry the state. Eleven electoral votes will be available to either party in the final count, and the fact that Mahone is rockless enough to carry local issues into the national canvass shows that he would not be disposed to coquettish with the republicans. He is bent upon carrying out the rule or暮 policy, and the Richmond Whig—a paper that is obscure enough to be Mahone's organ—says that "if it should be a question of life and death as between the readjuster party and the democratic party," its "voice would unhesitatingly and emphatically pronounce for the salvation of the former."

Meanwhile the republicans are building great hopes on the dilemma in which the democrats find themselves, and are preparing to run candidates for congress in every district, with prospects of success in six. As may well be supposed, the indications are not encouraging, but we have hopes that a sense of the overwhelming importance of harmony in the national campaign will cause the republicans of Virginia to see in this true light the criminal folly of dividing their forces.

**Dr. Tanner and His Stomach.**

Realize it or not we may be just now being treated to a miraculous exhibition in New York city. A man of presumably the same general make-up as the rest of us has been living in a room for sixteen days without food. He has been carefully watched. The water he drinks has been subjected to microscopic examination, and it is certain that no morsel of food and no drop of nutrition liquid has passed his lips in sixteen days. After the tenth day we were told that the faster was shedding phosphates and that his brain was rapidly passing away.

The distinguished editor of the New York Tribune says the republicans are not wised by the enthusiasm of the democrats. This is bad to begin with. If this had been definitely known in advance, we might have spared some trouble.

that he begins his seventeenth day in prime condition.

We are not of those who denounce this experiment as a crazy and useless one. On the contrary, we regard it as a very useful one. Enough has already been demonstrated by Dr. Tanner's experience to overthrow eighteen centuries of theory and assertion. Science is staggered by the protest of one man's stomach.

We believe that this experiment adds an entirely new fact to our limited knowledge of the human frame, the truth established by Tanner will be of practical benefit. Physicians who have cases where the inflammation of the bowels is the chief trouble, will find that they can keep their patients without food and consequent irritation, much longer than they did thought possible up to this time. Persons who are shipwrecked or lost in the woods, and who expect, according to the experience of those who have gone before, to die in seven days at the most, will now be pleased to learn that they have a precedent for living without food for seventeen days and upwards.

While the empty stomach is a poor substitute for an abundant meal, still the memory of Mr. Tilden's fast may be of consolation to these castaways.

Of course all this depends on the assumption that Tanner will recover after his period of abstinence and build up his wasted tissues again. This experiment will come to naught if it is only a duplicate of the Irishman's, who said of his mule, "As soon as I taught him to live without eating, he died!"

**Crops in Georgia.**

The report of the state department of agriculture for the month of June is an interesting document. Corn has been injured by drought in some sections, but it is believed that the recent rains have come in time to save the crop in middle and north Georgia. In some counties in east Georgia, the crop was too far advanced to entirely recover from the effects of the drought. The condition of the crop in the entire state, compared to an average is 87. Its condition in the different sections of the state compared to New York is north Georgia, 96; in middle Georgia, 81, in southwest Georgia, 92.

The department supplements these figures with the statement that auxiliary crops may be planted to supplement both corn and oats, the latter crop being a comparative failure.

The report says that cotton though retarded in its growth by drought, is not thought to be materially injured. On the contrary planters have availed themselves of the dry weather to put their crops in good condition. Enough rain during the month of June to make a full corn crop would probably have caused the abandonment of a large area of cotton, many having been disappointed in securing day laborers, on whom they relied for much of the work in their crops. There is an unusual complaint of scarcity of labor. The cotton prospect compares to an average in the whole state is 3.4 better than at the same date last year, though far below that of 1878. This year it is 95; in 1879 it was 92.6; in 1878, 105.

The production will depend on the weather during July and August, the critical months for this crop. By sections, the average condition is in north Georgia, which in the area devoted to this crop increases annually 102, in middle Georgia, 88, in southwest Georgia 103, in east Georgia, 85, and in southeast Georgia, 101.

With respect to oats, the report says they have been threshed in a large portion of the state, and the test of the harvest, if the rust-proof varieties had been universally sown, as they should have been, almost a full one. As it is, only 62 per cent of last year's crop is harvested for grain, showing that the rust-proof varieties have produced well.

An Ohio girl was struck by lightning while splitting wood in a thunder storm, but her father, who sat reading a novel, was not injured.

—Tanner has fasted quite long enough to convince laboring men that they can get along on one meal per day as well as three.

—More than half of the steamboats making connection at Atlanta with West Point have been sold.

—A Chicago doctor says that if female clerks in stores would abolish coffee drinking, there would be a saving of 100,000,000 dollars.

**MEETINGS.**

(Notices of meetings, not exceeding ten lines, will be inserted and this house for one dollar.)

**Y. M. C. A.**

Seventh Annual Meeting of the Atlanta Young Men's Christian Association.

The seventh anniversary of the Atlanta Y. M. C. A. will be held to-morrow (Friday) night at the Second Baptist Church, commencing at 8 o'clock.

Ex-senator John B. Gordon will deliver a short address.

The Music will be under the direction of Prof. E. B. Kruger, with a Coro to lead the congregation.

The public are cordially invited to attend.

**SO WE LEARN.**

—City politics are being discussed quite lively.

—Archery club meet for practice every afternoon in the city hall.

—The tennis clubs are commencing to be organized in Atlanta, and it can now be said that the ball season has commenced.

—Yesterday we had our regular afternoons show. The girls attended the dirt-pulling in the direction.

—Jack Johnson, candidate for council in the 4th ward, is ill for a speech at an early date.

—There are now about seventy-five guests at Porter Springs, and the number is increased daily by fresh arrivals.

—Shop-thieves promise to keep the police in employment during the present summer.

—Nine sets of scales have been placed in the post offices, which give each of the departments a select meter.

—The track of the Macon and Western railroad north of Cunningham's warehouse is being repaired.

—During the rain storm Tuesday afternoon considerable damage was done at Ponce de Leon by an overflow of water.

—Owing to a lack of water there was no swimming in the lake this morning.

—The first time that such a thing has occurred in several months.

—Richard Schnatz was tried in the city court, last evening, upon the charge of larceny, and upon being found guilty was sentenced to twelve months service in the county chain-gang.

—A man, yesterday, hailing from Rockdale county, was arrested on a warrant charging him with cheating and swindling, yesterday morning, by Officer Clark, of the police force. He will be taken to Rockdale for trial.

—Conrad John Thorne is keeping an excellent hotel in the city. —He says that Tom Terrell, his partner, proposed to him to buy a larger city than Atlanta had when he first settled here thirty-five years ago.

—What is the difference between a political and a Nationalistic? A Nationalistic promises many things and performs but few, while all Nationalists promises few and performs them.

—Nursing babies have been placed in the hospital, which gives each of the departments a select meter.

—The track of the Macon and Western railroad north of Cunningham's warehouse is being repaired.

—During the rain storm Tuesday afternoon considerable damage was done at Ponce de Leon by an overflow of water.
